

MAS-U-600S-R2

U-Bracket for 600LBS Electromagnetic Lock

Product Description

The MicroEngine MAS-U-600S-R2 is a U-shaped mounting bracket engineered to support the installation of 600 lbs electromagnetic locks on frameless glass doors. This bracket provides a secure and non-invasive way to attach the armature plate to the glass door without drilling, making it the ideal accessory for glass door applications.

Product Features

- Designed for Glass Doors**
 Specifically developed for frameless glass doors where traditional drilling or mounting is not feasible.
- Secure Armature Mounting**
 Allows the armature plate to be fixed safely to the glass door while maintaining proper alignment with the electromagnetic lock.
- Clean and Elegant Finish**
 Maintains the aesthetic integrity of modern glass entrances ideal for offices, retail, and high-end facilities.
