

MAS-ZL-600S-R2

ZL Bracket for 600LBS Electromagnetic Lock

Product Description

The MicroEngine MAS-ZL-600S-R2 is a specially designed ZL bracket set created for the installation of 600 lbs electromagnetic locks on inward-opening swing doors. This bracket set offers a complete solution for securely mounting both the EM lock and the armature plate, ensuring optimal alignment and holding performance.

Product Features

- Complete Mounting Kit**
 Includes L-bracket for the EM lock and adjustable Z-bracket for the armature plate designed for swing door configurations.
- Adjustable Armature Plate Positioning**
 The Z-bracket is adjustable, allowing precise positioning of the armature plate to ensure proper contact and secure locking.
- Strong and Secure**
 Made from durable, high-grade materials for stability and long-term use in demanding access control environments.
