

ME MOBILE ACCESS

Dynamic QR Decryption

Product Description

ME Mobile Access is a mobile application designed by MicroEngine Technology to provide secure, seamless, and convenient access control management via smartphones. It allows users to unlock doors, gates, and other secure areas using their mobile devices, reducing the need for traditional access cards or keys. ME Mobile Access integrates with MicroEngine's access control systems, enabling administrators to manage user permissions, monitor entry logs, and receive notifications in real-time.
